

PRAVEEN BAJPAI

Senior Software Engineer | Angular & TypeScript Specialist

+91 7011792747 • bajpaipraveen2026@gmail.com • linkedin.com/in/bajpaipraveen0 • Noida, India

PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 6+ years of experience building scalable, high-performance web applications using Angular and TypeScript. Currently at PureSoftware, contributing to enterprise healthcare solutions for Medicare Advantage and Part D systems. Skilled in Angular (2–20), RxJS, NgRx, REST APIs, Kendo UI, and unit testing (Jasmine/Karma). Experienced across diverse domains including vehicle sharing, job portals, and on-demand platforms. Strong in Agile delivery, stakeholder collaboration, and leveraging AI tools to enhance development efficiency and code quality.

TECHNICAL SKILLS

Frontend:	Angular (2–20), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
State Management:	RxJS, NgRx
UI Libraries:	Kendo UI, Bootstrap, Angular Material
API Integration:	REST APIs, Angular HttpClient, JSON
Testing:	Jasmine, Karma, Sahi Pro (E2E)
Version Control:	Git, SVN
Tools & Platforms:	JIRA, Jenkins (CI/CD), Firebase, Postman
Practices:	Agile, Responsive Design, Cross-browser Compatibility
AI Tools:	ChatGPT, Claude, Prompt Engineering
Knowledge:	Oracle SQL, JWT, OAuth, SEO, Lazy Loading, Change Detection, Docker, Signals

PROFESSIONAL EXPERIENCE

PureSoftware Ltd

Software Engineer | **MHK (Healthcare – Medicare Plans)** | Jun 2021 – Present

Tools: Angular, RxJS, TypeScript, HTML, CSS, SCSS, Kendo UI, NgRx

- Developed and maintained scalable web applications in the Medicare Advantage & Part D domain, covering enrolment, member management, and billing workflows.
- Built reusable, responsive UI components by translating mock-ups into pixel-perfect Angular modules, improving UX across the platform.
- Integrated RESTful APIs using Angular HttpClient and implemented NgRx-based state management for predictable data flow.
- Led requirement analysis and stakeholder meetings; managed sprint tasks and defect tracking via JIRA in an Agile environment.
- Maintained CI/CD pipelines using Jenkins, ensuring reliable deployment and faster release cycles

TecOrb Technologies

Frontend Developer | **Ejaro – Peer-to-Peer Vehicle Sharing (GCC)** | May 2019 – Jun 2021

Tools: Angular, RxJS, TypeScript, HTML, SCSS, Bootstrap, Firebase, Google APIs, Socket.io

- Contributed to Ejaro, the first licensed peer-to-peer vehicle sharing platform in the GCC, delivering a real-time production application used across Saudi Arabia.

- Integrated Firebase, Google Maps API, Socket.io, and multiple Saudi government APIs to enable live vehicle tracking and in-app chat.
- Led the Additional Notification epic, ensuring seamless real-time user communication across mobile and web.
- Improved application performance by 15% through Angular lazy loading and optimized change detection strategies.
- Collaborated directly with Saudi government authorities on requirement gathering, daily syncs, and compliance tracking via JIRA.

Frontend Developer | Forfixer Admin – On-Demand Technician Platform (Oman) | Aug 2020 – Apr 2021

Tools: Angular, HTML, SCSS, Bootstrap, Google API

- Developed admin workflows for Forfixer, an on-demand technician service platform in Oman, enabling efficient request handling and real-time technician assignment.
- Built and enhanced features to manage user requests and assign nearby technicians, reducing manual dispatch time.
- Integrated RESTful APIs for smooth frontend–backend communication; collaborated with cross-functional teams in Agile sprints.

Frontend Developer | JobsHola – Job Portal (Singapore) | Jun 2020 – Jun 2021

Tools: Angular, HTML, SCSS, Bootstrap, Google API, Socket.io

- Contributed to JobsHola, a Singapore-based job portal (similar to Naukri) enabling job search, application, and resume building.
- Developed responsive UI by converting PSD designs into reusable Angular components with a focus on user experience.
- Built features for multiple user roles (Seeker, Employer, Admin), ensuring smooth job matching and application workflows.
- Integrated RESTful APIs and participated in requirement analysis, effort estimation, and JIRA issue tracking.

EDUCATION

Degree / Board	Institution	Year
MCA (Master of Computer Applications)	IMS, Ghaziabad	2018
BCA (Bachelor of Computer Applications)	MJPRU, Bareilly	2015
Intermediate	Allahabad Board	2012
High School	Allahabad Board	2010

KEY HIGHLIGHTS

- Pioneered frontend for Ejaro — GCC's first licensed peer-to-peer vehicle sharing platform (Saudi Arabia).
- Delivered enterprise healthcare solutions at MHK covering Medicare Advantage & Part D plan management.
- Achieved 15% performance improvement on Ejaro via Angular lazy loading and change detection optimization.
- Experienced in multi-domain projects: healthcare, ride-sharing, job portals, and on-demand services.
- Early adopter of AI-assisted development using ChatGPT and Claude for code generation, debugging, and review.

CERTIFICATIONS & AWARD

- AMCAT Certification
- Microsoft Technology Associate: Software Development Fundamentals (MTA)
- BRAVO for outstanding performance - July 2022
- BRAVO for outstanding performance - October 2023
- BRAVO for outstanding performance - November 2025
- Project Management Assessment by [LearnTube.ai](#)
- ARJUNA for Breakthrough performance - JFM Quarter 2026
